

Non-Template Molecules Designed For Open-Ended Evolution

© Chris Gordon-Smith 2011

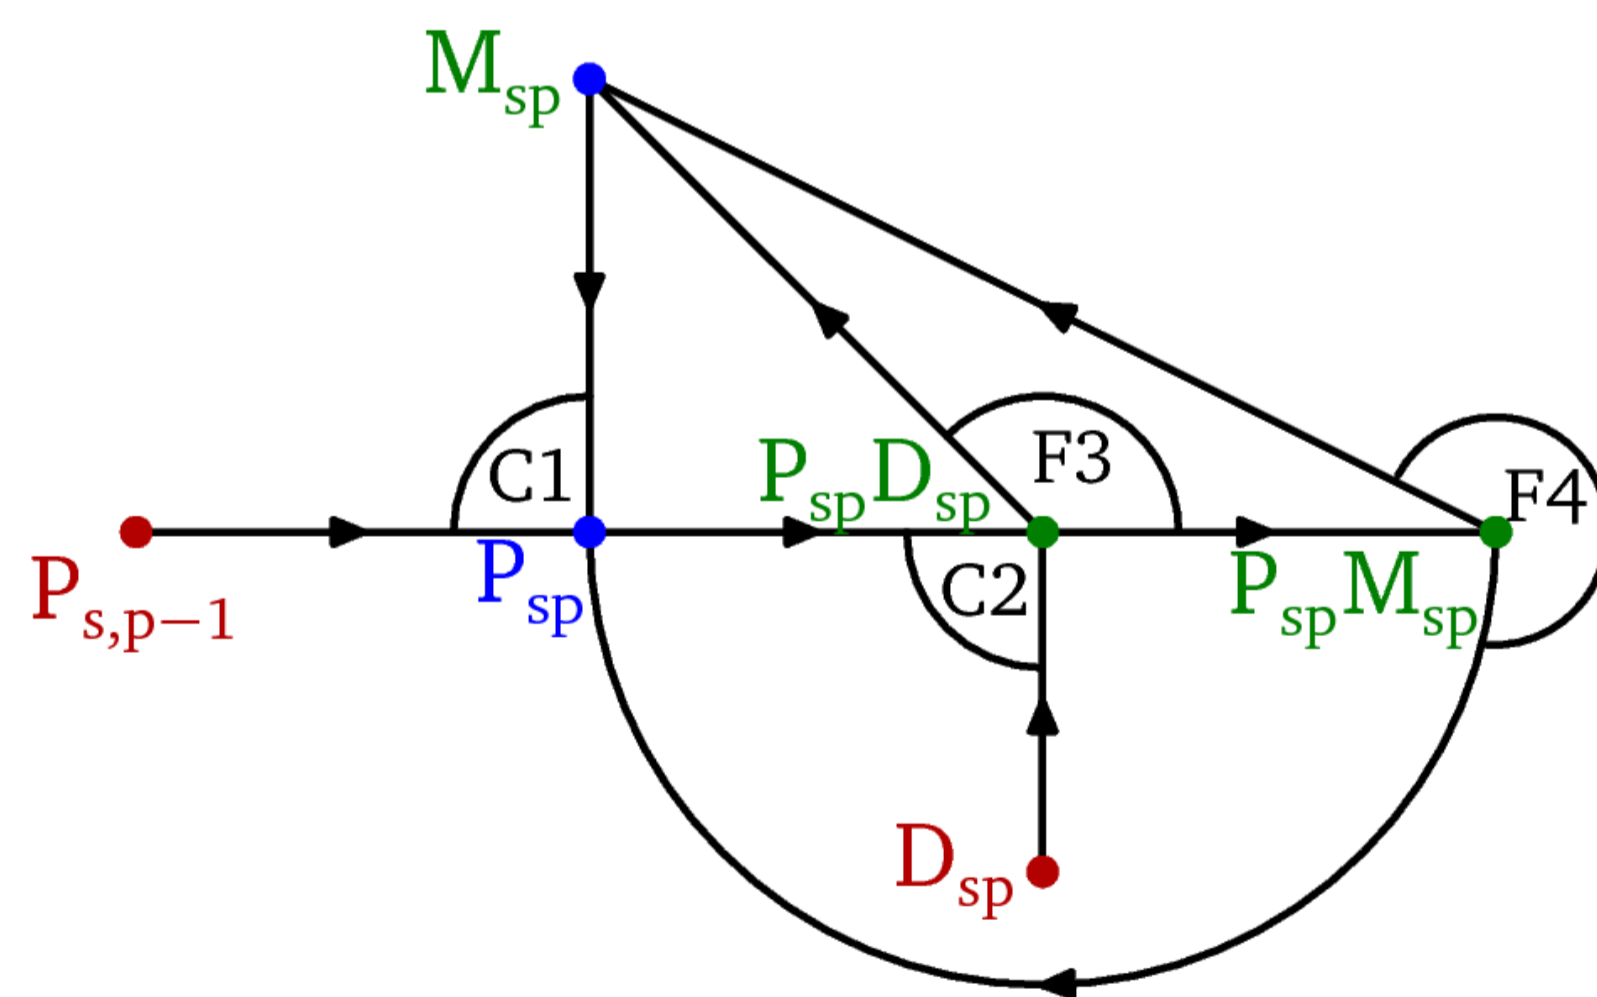

Question

Could life start as a metabolic system without template replicators?

SimSoup Proof Of Concept Approach

Design an artificial chemical network and molecular structures for open-ended evolution. Simulate.

Memory Unit

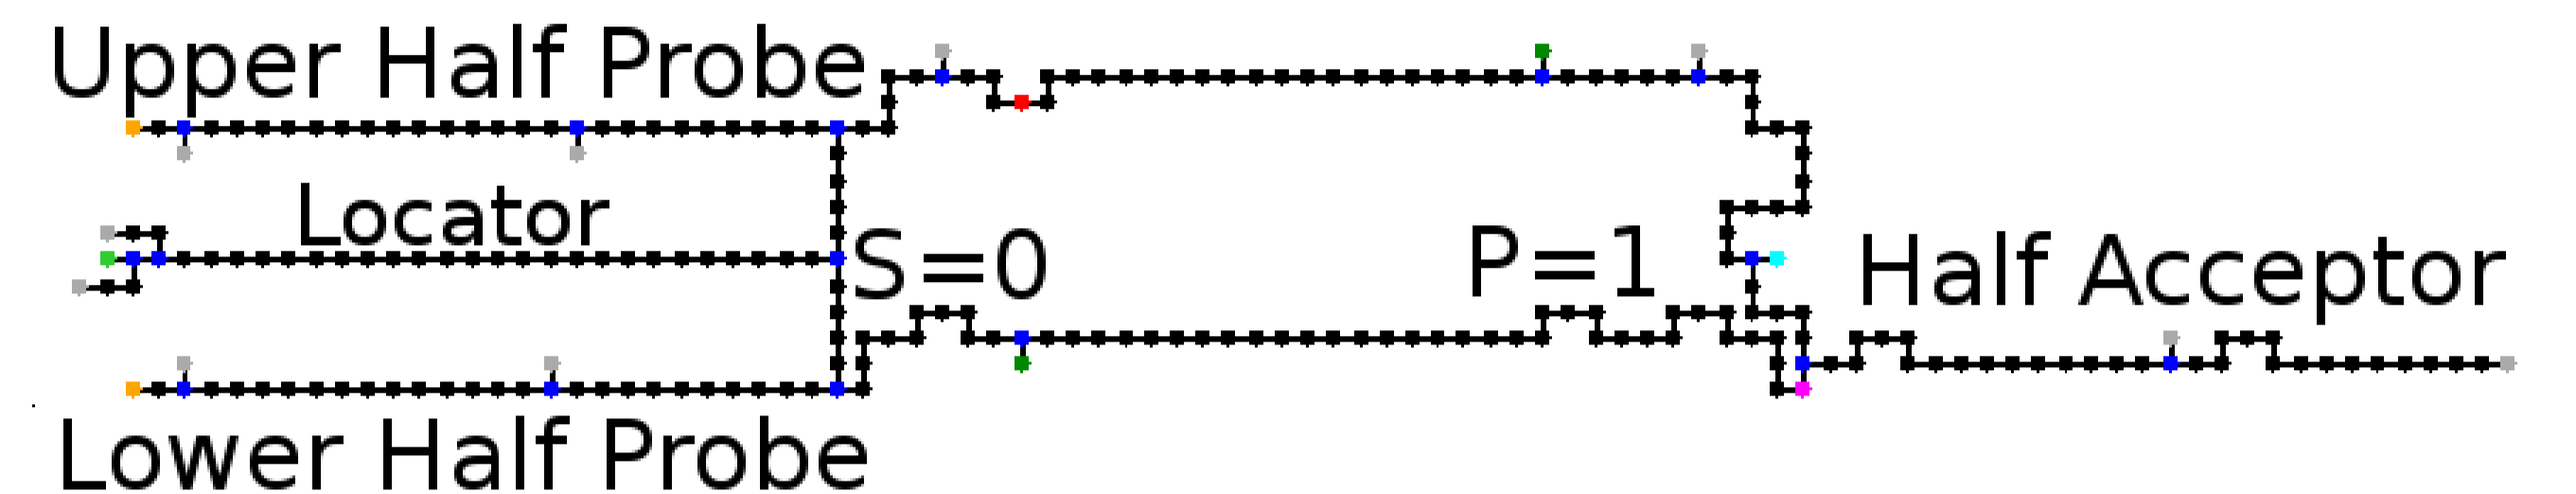

Capacity 1 bit

Memory Bank Network

10 series of 9 units \longrightarrow 10^{10} bits

Memory Bank Molecules

Monomer M_{01} : Building Block

Polymer P_{03} : Constructed By SimSoup

Closed Dimer D_{01} : Split By P_{01} To Maintain Autocatalytic Set
